

FOR ANIMAL USE ONLY

VIT-AID
Vitamin A Injection
Reg. No. G0678 Act 36/1947

INDICATIONS

VIT-AID Vitamin A Injection is a water-based solution of Vitamin A, for the prevention and treatment of Vitamin A deficiency in cattle.

COMPOSITION

Each ml of VIT-AID contains 5000 000 i.u. Vitamin A and 50 i.u. Vitamin E.

STORAGE INSTRUCTIONS

Store partially used bottles in a refrigerator.
Store in a cool dark place.

WARNINGS

- DO NOT USE ON HORSES.
- Keep out of reach of children, uninformed persons and animals.
- Although this remedy has been extensively tested under a large variety of conditions, failure thereof may ensue as a result of a wide range of reasons. If this is suspected, seek veterinary advice and notify the registration holder.

DIRECTIONS FOR USE: USE ONLY AS DIRECTED

VIT-AID Vitamin A Injection is injected intramuscularly with a 15 – 18 gauge needle of 4 – 5 cm length.

Application should be made in a well fleshed area, preferably in the neck muscle.

Use clean sterilised needles and syringes and also disinfect the site of injection and bottle cap with alcohol or other disinfectant.

A standard dose of 1 ml/250 kg body mass (viz. 2 000 i.u. per kilogram body mass) is recommended for cattle for every period of three months.

Cattle:

Adults (± 500 kg body mass):

2 ml per head

Weaners (± 250 kg body mass):

1 ml per head

Important:

Under intensive farming conditions, the Vitamin A needs may be much higher, but consult an animal health nutritionist or veterinarian before dosages are increased.

N.B. Do not depart from the above dosages without consulting an animal nutritionist or veterinarian.

Presentation: 100 ml
