

## PACKAGE INSERT: COPRONAT

### **COPRONAT® LIQUID SPRAY SOLUTION**

Reg No V22705 Act 36 of 1947

Class: Additive to control odour used for dogs and cats

### **COMPOSITION**

Each 100ml contains

<i>Yucca schidigera</i> extracts	1,0 ml
Grape seed extract	0,05 ml
Preservative	
Potassium Sorbate	0,2 % m/v

COPRONAT® is a natural food supplement containing *Yucca schidigera* extract (YSE) which has been shown to control coprophagy and eliminate the offensive odour associated with flatulence in both cats and dogs. *Yucca schidigera* is a plant that grows in the deserts of Southern California and Mexico. The addition of YSE to the diet of dogs and cats significantly changes the aroma of their faeces by reducing the production metabolites associated with the manufacture of sulphides. (Lowe *et al.* Res. Vet. Sci. 63:67-71, 1997, Giffard *et al.* JAVMA 218: 892-896, 2001) The beneficial effects *Yucca schidigera* is a result of *Yucca schidigera* containing high concentrations of saponins and polyphenols including resveratrol and yuccaols (Cheeke *et al.* Journal of Inflammation, 3: 6, 2006).

### **INDICATIONS**

Dietary supplement COPRONAT® is a 100% natural product made from *Yucca schidigera* extract.

COPRONAT® is used as an aid in the control of coprophagy and flatulence.

### **CONTRA-INDICATIONS**

None

### **DOSAGE & DIRECTION FOR USE**

2 ml COPRONAT® (4 sprays) per 10 kg body weight must be sprayed onto the animal's food at each meal.

For Flatulence: COPRONAT® must be sprayed onto the food of the animals that experiences flatulence.

For Coprophagy: COPRONAT® must be sprayed onto the food of the animal whose faeces are being consumed. In practice the treatment regimen for coprophagy is as follows:

- For a dog that is eating its own faeces: COPRONAT® must be sprayed onto the food of the dog that is eating its own faeces.
- For a dog that is eating cat faeces: COPRONAT® must be sprayed on the food of the cat whose faeces are being consumed.
- For a dog that eats the faeces of other dogs: COPRONAT® must be sprayed on the food of the dog/s whose faeces are being consumed.

COPRONAT® can also be used to reduce the smell of cat litter, by spraying the COPRONAT® in the cat's food.

### **IDENTIFICATION**

Brownish green solution with a characteristic odour of natural plant extracts.

### **PRESENTATION**

COPRONAT® is packed in aluminium spray bottles closed with a screw on spray pump covered with a plastic cap. Bottles of 250 ml are available.

**STORAGE INSTRUCTIONS**

Store below 25 °C. KEEP OUT OF REACH OF CHILDREN AND UNINFORMED PERSONS.
