

FOR ANIMAL USE ONLY

FIBREMAX

Reg. No. V26352 Act 36/1947

SHAKE WELL

STORAGE

Keep in a cool dry place but do not refrigerate.

COMPOSITION PER 100 ml

Polyethylene Glycol (PEG) & Polivinylypyrrolidone (PVP)	30 000 mg
Propylene Glycol and alkalining buffering agents	22 000 mg

INDICATIONS

The ultimate digestive support solution during browsing and poor value grazing. A water soluble solution of anti Tannin and Terpene inhibitors fortified by energetic and buffering support to limit the digestive and health constraints from tannin and terpenes associated with browsing and consumption of poor value grazing in dry periods and winter. FIBREMAX support animal wellbeing with more efficient use of available plant material.

DIRECTIONS FOR USE

USE AS DIRECTED.

Shake well before use.

Recommended stages for use

During winter time and drought conditions to facilitate increased consumption of less palatable plant material without causing digestive constraints.

WATER application

Add 200 ml FIBREMAX per 1000 L of drinking water on a continuous basis and prevent dilution from fresh water inflow.

LICK application

Mix 1 L FIBREMAX + 9 L of clean water per 100 kg lick mixture for a sustainable lick intake of 400 – 500 g / day for 450 – 500 kg animals.

Mix FIBREMAX with the salt portion of the lick and allow to mix through. Then add the remainder of the ingredients and complete mixing.

Adjust FIBREMAX inclusion rate according to increased levels of lick intake or consult the registration holder or nutritionist formulating the lick.

PRESENTATION

1 L, 5 L
